WITH PROPER CARE, YOUR POLY WOOD OUTDOOR FURNITURE WILL  
LAST A LIFETIME. PLEASE FAMILIARIZE YOURSELF WITH THE  
FOLLOWING CARE GUIDELINES:

## **For Routine Cleaning and Care:**

Generally, spraying your Poly Lumber furniture with a garden hose and the use of a soft bristle brush or clean cloth is all you will need to keep your furniture looking good and ready for use.

## **General Tips for Maintenance:**

- ✓ A soapy solution of dish soap and water may be used for general cleaning, applied with a soft bristle brush or clean cloth. Rinse thoroughly.
- ✓ For extra cleaning power or to sanitize, mix 1/3 bleach and 2/3 water. Apply with a soft bristle brush or clean cloth. Allow to sit on the surface for a few minutes. Loosen any debris with a soft bristle brush or clean cloth. Rinse thoroughly
- ✓ A high-pressure power washer may be used; not to exceed 1500 psi.
- ✓ Tilex may be used to remove mildew or mold. Saturate the problem areas, allow the Tilex to sit for a few minutes. Clean and rinse thoroughly.
- ✓ Poly Lumber requires no waterproofing, scraping, staining, painting, or other similar maintenance.
- ✓ Avoid use of solvents and harsh cleaners. Use of these products can react with the plastic and cause damage.
