MONARCH REST™

www.monarch.rest

It's time to find rest.

A good night's sleep is one of the foundations of health, contributes to productivity, and affects your well-being. Our goal is that every mattress we build will help someone sleep well.

Each mattress is hand-made, harmonizing our heritage of Swiss-German craftsmanship with current sleep technology for a well-tuned mattress.

Tossing and turning on a mattress past its prime is no "good night." From our first mattress in 1991 to our full line-up of premier mattresses today, Monarch Rest is devoted to exceptional comfort and long mattress life.

May your body and soul find deep rest! 💎

—JOLAN MILLER, CEO

TABLE OF CONTENTS

DECODING COMMON TERMS

- Wt.** Short for weight, measured in lbs. per cubic foot. This is a rating of the denseness of polyurethane and convoluted foam. Larger numbers are denser and heavier (typically varies from 1.0-2.5 lbs).
- 55/75/95** Latex foam density is measured with these numbers; larger numbers are denser and firmer.
- ILD** Short for Indentation Load Deflection. This is a rating for foam firmness. Larger numbers are firmer. Typical mattress foam varies from 15-50.

Quiet Night

Traditional Innerspring Mattress

Standard sizes: Twin, Twin XL, Full, Queen, King, and California King. Custom sizes available by special order.

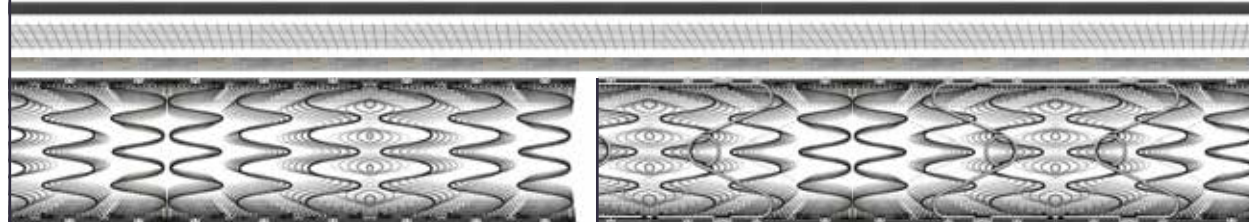

The Quiet Night line of mattresses don't have any frills, but every stitch and detail is crafted with the same care and quality of our most expensive mattresses. Even those on a budget or looking for something simple can have the legendary Monarch Rest™ quality and the unparalleled 20-year warranty.

Elite

Premium Two-Sided Mattress

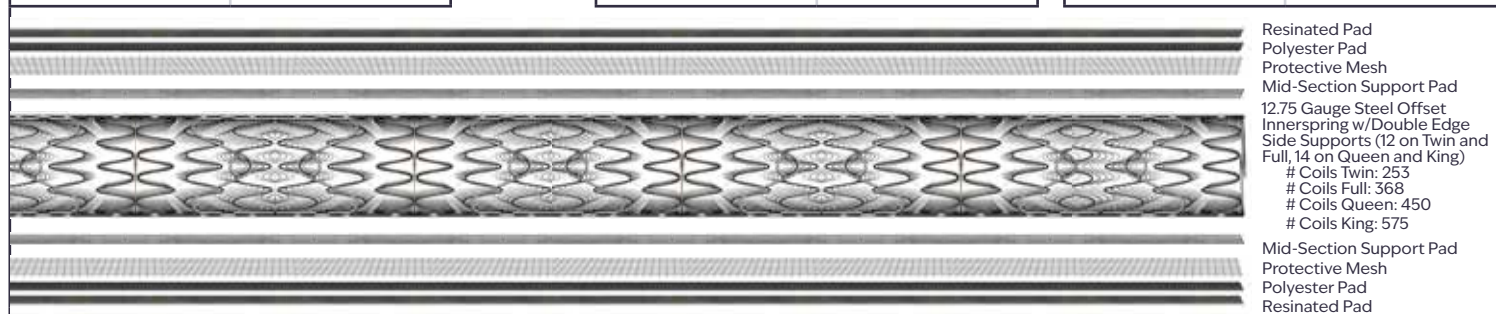

Standard sizes: Twin, Twin XL, Full, Queen, King, and California King. Custom sizes available by special order.

2-SIDED

The Elite line is the gold standard for a two-sided mattress, with consistent and long-lasting quality and a wide range of materials and firmnesses. The offset coil innerspring of the Elite mattress has more flexibility and support than a traditional Bonnell coil. The double-sided design allows regular rotation to increase longevity and keep your mattress wearing evenly.

Integrity

Pocket Coil Luxury

Standard sizes: Twin, Twin XL, Full, Queen, King, and California King. Custom sizes available by special order.

ADJUSTABLE

The inner support core of the Integrity mattress is made of pocketed steel coils that give independent suspension within the core frame. The textile pockets are fused to each other, allowing the springs to move independently, so there is less side-to-side motion transfer which means less partner disturbance.

Resilience

Made to Adjust

Standard sizes: Twin, Twin XL, Full, Queen, King, and California King. Custom sizes available by special order.

ADJUSTABLE 2-SIDED

The Resilience line is specifically designed to work well on adjustable beds, with the added benefits of a 2-sided mattress. Rather than different tops on a common core like our other lines, the Resilience line has the same luxurious latex top on three unique cores to tailor your support. Pair with a Monarch Rest™ adjustable foundation for a premium experience.

Standard Foundations

What lies under your mattress is nearly as important for durability and comfort as the mattress. Many modern mattresses are sold without much, if any, consideration about the optimal foundation to pair with them. However, we have carefully chosen the recommended foundation type for each of our mattresses.

However, that doesn't mean you are locked in if you want to make your own decision! Many of our foundations are customizable and changeable. Get the height, fit, support, and feel you want for a perfect night of sleep.

Wood Foundation

STANDARD ON SINGLE-SIDED

A premium 14-slat foundation has 1 x 3 top slats spaced 2.5 inches apart. This gives a strong solid base for your mattress, with less motion transfer.

**Standard Quiet Night foundations use a more economical 8 slat version. Number of slats varies +/-1 depending on bed size.*

14 slat wood foundation
7.5 in. height • #F8H

Low-profile 14 slat wood foundation
4.5 in. height • #F5H

8 slat wood foundation
7.5 in. height • #F8
Also available in low-profile • #F5

Boxspring

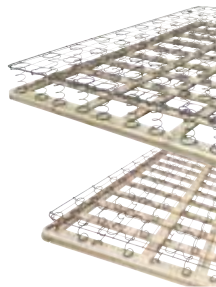

STANDARD ON TWO-SIDED

Many boxsprings no longer have actual springs in them. Ours have true flexing coils, providing a responsive shock-absorbing base perfect for dense double-sided mattresses.

**Number of coils is from 54-120 depending on bed size.*

Standard boxspring
8 in. height • #B8

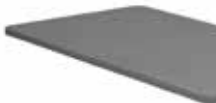

Low-profile boxspring
5 in. height • #B5

Bunkie Board

Extra support with an extremely low profile. Use to create a solid, level surface on platform beds, or on bunk beds where there is limited height.

8 slat bunkie board
2 in. height • #BB

Adjustable Foundations

Get the comfort and support you need for sleeping, reading, catching up on emails, or simply lounging. Our adjustable foundations allow you to adjust the head or foot of the mattress, enabling you to adjust your bed to your lifestyle.

The Resilience mattress line was especially designed to take advantage of adjustable foundations. The Integrity and Conformia mattress lines work well too.

Single or double-sided?

DOUBLE-SIDED

Two-sided Monarch Rest™ mattresses have comfort layers built on top of an inner core for a luxurious night of rest on either side of the mattress.

Double-sided mattresses are especially popular with those wanting to receive additional years of comfort from their bedding investment.

We recommend rotating the mattress from head to foot and flipping it every Spring and Fall. Periodic rotation and flipping prevents uneven wear.

SINGLE-SIDED

The single-sided mattress is padded on one side. The other side is designed to rest upon the foundation with a durable nonskid surface. You can rotate them periodically to improve their durability, but do not flip the mattress.

Single-sided Monarch Rest™ mattresses are built from the support core upward. The bottom is designed to rest upon a foundation. Single-sided mattresses allow for large customization of the comfort layers to pinpoint the perfect plush or firm feel. This customization accounts for the growing popularity of the single-sided mattress.

We recommend rotating it from head to foot once every three months. Periodic rotation protects against uneven wear. Single-sided mattresses cannot be flipped.

The Matchless Monarch Rest™ Warranty

We have tasked ourselves with building a mattress to levels of quality both you and we can rely upon. Because we are committed to standing behind our work, all our standard Monarch Rest mattresses come with an unprecedented, industry-leading 20-year limited warranty. Here's what this means, all legalese aside:

ELITE, CONFORMA, PERFECT CHOICE, INTEGRITY, RESILIENCE

First 10 Years: We will replace or repair for free any mattress with workmanship defects or component failures, including impressions exceeding ½ inch. You pay nothing but transportation.

Next 10 Years: We will replace or repair for 50% off any mattress with workmanship defects or component failures. Impressions must exceed 1 inch.

QUIET NIGHT

First 7 Years: We will replace or repair for free any mattress with workmanship defects or component failures, including impressions exceeding ½ inch. You pay nothing but transportation.

Next 13 Years: We will replace or repair for 50% off any mattress with workmanship defects or component failures. Impressions must exceed 1 inch.

Rest easy with the Monarch Rest 20-Year Limited Warranty to safeguard your investment. We recommend using a mattress pad at all times to further extend the life of your mattress.

ALL THE DETAILS

The quality and craftsmanship that are built into every Monarch Rest™ mattress and foundation allows Rainbow Bedding Co. to offer a limited warranty against defects in workmanship or materials. This warranty extends only to the original purchaser.

Proof of purchase with date, place of purchase and purchase price is required to obtain service under this warranty.

If service resulting from any such defect is required during the non-prorated year(s) after purchase, your Monarch Rest™ mattress and/or foundation will be repaired or at manufacturer's option—replaced without charge for labor and materials, exclusive of transportation costs.

If service resulting from such a defect is required during the remaining years of the applicable limited warranty indicated on the schedule below, your Monarch Rest™ mattress or foundation will be repaired or replaced, with warranty credit calculated as shown in the schedule for the model you purchased, plus all transportation costs. If identical materials are not available at time of service, manufacturer may substitute materials of the comparable quality.

THIS LIMITED WARRANTY SHALL NOT APPLY UNDER THE FOLLOWING CIRCUMSTANCES:

1. If this product is used for commercial purposes.
2. When product failure is due to causes other than defective workmanship or material.
3. If you are not the original purchaser.
4. If purchaser does not present proof of purchase.
5. If the mattress and/or foundation are stained or in unsanitary condition.

FOR THE WARRANTY TO APPLY, MONARCH REST™ MATTRESSES MUST BE SUPPORTED BY ONE OF THE FOLLOWING:

- A Monarch Rest™ boxspring or foundation supported by a bed having a minimum of 3 cross slats and 1 center support post.
- A Monarch Rest™ boxspring or foundation supported by a metal frame with center support.
- A platform bed having a solid deck and having sufficient weight rating (on a platform bed with only slats, use a Monarch Rest™ bunkie board).
- A motion base (if the mattress is specifically designed for motion bases).

Mattress upholstery will settle and stretch with use. This is unavoidable and is not covered under warranty unless the impression exceeds 1/2 inch during the no charge period and 1 inch for the remainder of the warranty period.

If the mattress appears to be defective, contact the Monarch Rest™ dealer where you bought your mattress and we will send you an Impression Measuring Kit. Follow the instructions and e-mail us the photos.

WARRANTY CODE ON LAW LABEL TAG	TOTAL LIMITED WARRANTY PERIOD	PERIOD FOR NO CHARGE* REPAIR OR REPLACEMENT	WARRANTY CREDIT FOR REPAIR OR REPLACEMENT BEYOND NO CHARGE* PERIOD
Ⓐ	20	7	We credit 50% of the current retail price toward the purchase of a new mattress, or 50% off repairs if mattress is refurbished.
Ⓑ	20	10	We credit 50% of the current retail price toward the purchase of a new mattress, or 50% off repairs if mattress is refurbished.

*Exclusive of transportation costs.

Monarch Rest™ mattresses are made by hand with obsessive attention to detail.

HAND ASSEMBLED

The innerspring core is layered with multiple layers of insulation to keep the high density foam padding from wearing directly against the steel springs.

Aligning the layers carefully and attaching the cover properly are key to building a neatly tailored mattress.

THE FINISHING TOUCH

After the components have been assembled, the mattress is ready for the final step. A skilled craftsman uses a tape-edger machine to bind the cover and border together using color-coordinated binding to finish off the Monarch Rest™ mattress.

We put in a lot of effort to package your mattress so it arrives at your home clean and undamaged.

These are just a few of the details we have honed over decades that allow us to confidently stand behind our industry-leading warranty.

STURDIER INNERSPRINGS

The wire gauge of an innerspring is just as important as the number of coils. We use 12.75 or 13 gauge wire for our innersprings, which is much heavier than the industry standard of 14.5 gauge.

QUALITY INSULATION

The insulation is hidden within the mattress. In the component illustration for each mattress, you can see that carefully selected components combine to keep the foam padding from being pushed down into the innerspring. Insufficient insulation will result in damaged foam and body impressions. We have carefully chosen and tested our insulation to help all the layers work together for optimal endurance and comfort.

LONG-LASTING HIGH-DENSITY FOAM

In the past, the industry used high-density 1.8 wt. quilting foam as standard. Today, many manufacturers have switched to low-density, super soft foam in the quilting and padding. A 1.8 wt. foam will last approximately twice as long as 1.2 wt. before softening & developing impressions. All our mattresses are built with the time-tested 1.8 or higher weight foam padding.

DOUBLE-EDGE SIDE SUPPORTS

We build our beds with the strongest, most durable double-edge coil side supports that we could find. We believe they provide the best edge support when compared to other support systems.

STANDARD BED SIZES

TWIN: 38"×75"	QUEEN: 60"×80"
TWIN XL: 38"×80"	KING: 76"×80"
FULL: 53"×75"	CAL KING: 72"×84"
FULL XL: 53"×80"	

Every mattress we make
is individually hand crafted in the
restful, rolling hills of Sugarcreek, Ohio and filled
with our most valuable asset:
